

# THIRDHAND SMOKE

is the tobacco smoke residue that remains after a tobacco product has been put out.

After smoke clears, **toxins linger**, which may leave an odor.

Thirdhand smoke **contains chemicals** known to cause **cancer**.

Smoke **residue sticks** to clothing, hair and skin.

**Lingering toxins** resist normal household cleaning.

Thirdhand smoke **builds up** over time on carpets, walls, furniture, plastic toys and stuffed animals.

Infants and children are **more exposed** to thirdhand smoke because they crawl on the floor and put things in their mouths.

**IF YOU SMOKE, protect your family, friends and coworkers, wash your hands and hair and change your clothes before coming into contact with others, especially infants and children.**
